F O R E W O R D

This report includes only foreign flag oceangoing merchant type ships of 1,000 gross tons and over owned by United States parent companies located and incorporated in the United States, either by direct ownership or through a foreign subsidiary company. Therefore, by the above definition it excludes ships owned by United States citizens or a foreign company which is not owned by a company located and incorporated in the United States.

For purposes of brevity and consolidation of data with other ship information prepared in the Maritime Administration, the following procedure is followed with regard to showing relationship between subsidiaries and parent companies. If a registered owner of ships, Company "A" is wholly owned by Company "B" which owns no ships, but in turn is wholly owned by Company "C", the apex of pyramiding companies, then Company "C" is noted as the parent company of Company "A" and Company "A" will be listed in the report as a subsidiary under parent Company "C".

In cases where Company "D" is jointly owned by Companies "E" and "F" footnotes indicating this dual ownership have been noted.

An "X" has been used to denote vessels covered by War Risk Insurance (Title XII of the Merchant Marine Act of 1936, as amended) as of June 30, 1975. Authority for the War Risk Program under the Act expired on September 7, 1975. It has been re-instated as of October 17, 1976, however, implementing regulations have not been issued as of January 1, 1977.

Summary by flag, showing type, number of ships and tonnage; a listing showing the United States parent companies and their foreign affiliates; and a name listing of ships by owner showing where built, flag and other characteristics.

PART II - Under Construction

Summary by flag, showing type, number of ships and tonnage; and a listing by owner showing name or hull number, if available, and other characteristics.

INTRODUCTION

At the close of 1975 there were 739 vessels of 16,459,252 deadweight tons (dwt) owned by U. S. parent companies and registered under foreign flag. This was an increase of five percent in the number of vessels and 12 percent in tonnage from the previous year. In comparison, the U. S. privately owned fleet, which excludes foreign registered ships, decreased one percent in number and increased four percent in tonnage during 1975. The number of vessels in the world fleet increased by two percent in number and eleven percent in tonnage.

Foreign flag registry of U. S. owned vessels was 30 percent greater, in terms of number of vessels, and 300 percent greater in tonnage, than the U. S. registered fleet, by the end of 1975.

Tankers accounted for the largest share of the U. S. owned foreign registered vessels with approximately 71 percent, followed by bulk carriers with 18 percent and freighters with 11 percent.

Vessel Composition as of 12/31/75
(Tonnage in thousands)

Registry of U. S. Owned Vessels	Total		Tankers		Bulk Carriers		Freighters		Combination Pass. & Cargo	
	No.	DWT	No.	DWT	No.	DWT	No.	DWT	No.	DWT
U. S. Flag	580	15,028	250	9,475	19	544	305	4,959	6	50
Foreign Flag	739	59,979	523	52,841	130	6,746	86	392	*	-

*Five combination vessels are included in the Freighter category.

was 37,900 dwt, while the U. S. owned foreign registered tankers averaged 101,034 dwt. In addition, there were more than twice as many U. S. parent company owned tankers registered under foreign flags than under U. S. flag. U. S. oil companies and their foreign affiliates own the majority of these tankers registered under foreign flags.

There were 130 U. S. owned bulk carriers registered under foreign flags compared to 19 bulk carriers registered under the U. S. flag. The average size of U. S. registered bulk carriers has increased in recent years to 29 thousand dwt, although the foreign registered U. S. owned bulk carriers averaged 52 thousand dwt. The United States bulk carrier fleet ranked twenty-sixth in the world during 1975, while the U. S. parent

The predominant flag of registry for all vessels owned by U. S. companies and their overseas affiliates continued to be Liberia. This flag accounted for 52 percent of the total number and 64 percent of the total dwt of all foreign registered U. S. owned vessels. In addition these vessels represented a substantial segment of the Liberian merchant fleet, accounting for 29 percent of the total DWT of this country's fleet. Tankers registered under Liberian flag and owned by U. S. parent companies constituted 37 percent of the total DWT in this country's tanker fleet. Liberian registered bulk carriers owned by U. S. parent companies constituted 16 percent of the total DWT of this country's bulk fleet.

Vessels under construction or on order by U. S. companies and their overseas affiliates, which were destined for foreign flag registry during 1975, were down from previous years, reflecting the worldwide downturn in the market for new ship construction. As of December 31,

1975, there were 77 vessels under construction or on order, a decrease from 101 vessels under construction or on order from the previous year. Furthermore, of these 77 vessels, 21 were orders placed during the 1975 calendar year, while 56 were contracted for prior to 1975.
